

Ideation Phase

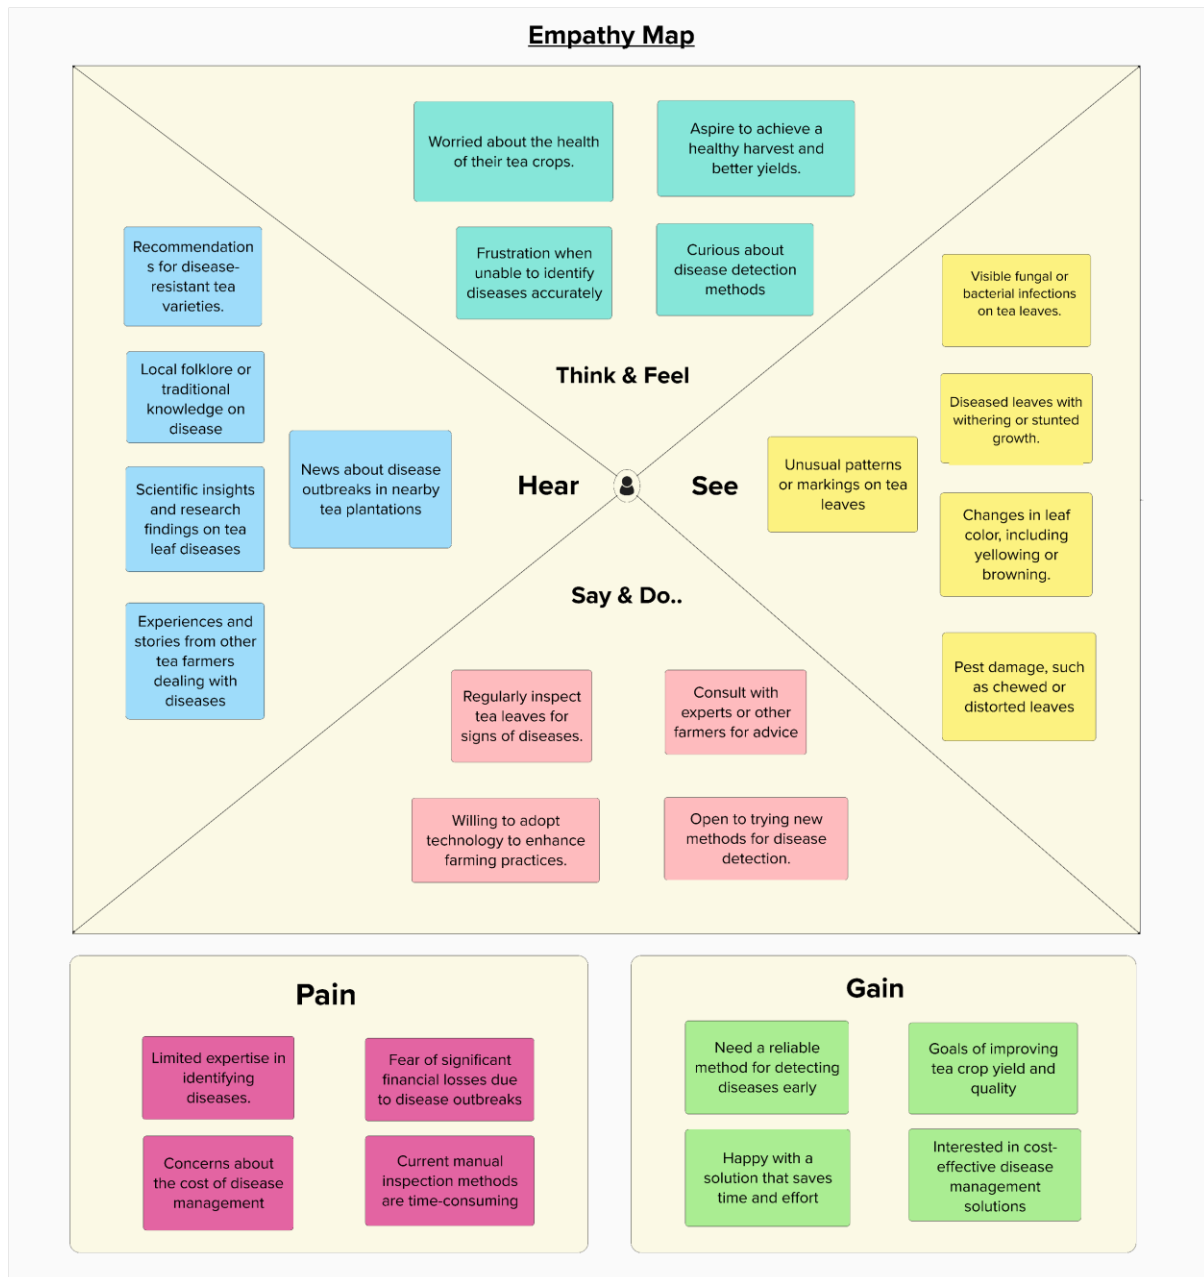

Empathize & Discover

Date	30-10-2023
Team ID	Team-592384
Project Name	Deep Learning Model For Detecting Diseases In Tea Leaves
Max Marks	4 Marks

Empathy Map Canvas:

An empathy map is a visual or textual tool used in design thinking and user experience (UX) design to help teams understand and empathize with the needs, thoughts, emotions, and experiences of a specific user or customer. It is a way to gather insights and gain a deeper understanding of the people for whom a product or service is being designed. The empathy map typically includes six key sections:

1. Think & Feel
2. See
3. Hear
4. Say & Do
5. Pain
6. Gain
